Moving Up! Implementation Coach is an iPad app that provides educators with feedback about evidence-based instructional practices.

Product Information

Moving Up! Implementation Coach™ is a tablet-based app designed to provide information about the delivery of instruction including fidelity of implementation, intervention intensity, and use of evidence-based instructional practices.

Available for use with Enhanced Core Reading Instruction. Additional programs are in development.

Moving Up! Implementation Coach:
- Facilitates the collection of accurate instructional implementation data.
- Brings colleagues together to create a shared vision and goals for instructional practices.
- Informs professional development goals and topics.
- Allows districts and schools to use a common data collection approach around evidence-based instructional practices.

Who should use Moving Up! Implementation Coach?
Moving Up! Implementation Coach is recommended for administrators, instructional coaches, school psychologists and mentor and peer teachers, in cooperation with teachers and teaching assistants.

Moving Up! Implementation Coach provides information about:
- Use of Evidence-Based Instructional Practices. Rated on a 4-point scale, each of eleven practices is supported by evidence from well-conducted research. Examples of Instructional Practices include Organization of Instructional Materials and Classroom Management.
- Intervention Intensity: Frequency counts of key instructional behaviors such as group responses, individual responses, errors and academic feedback.
- Fidelity of Implementation: Instructional Areas. Skills taught in a specific program/curriculum are rated as taught, partially taught, not taught, or not required for a given lesson. Eight instructional areas are associated with Enhanced Core Reading Instruction. Examples include blending sounds and regular word reading.
- Fidelity of Implementation: Components. Instructional methods are rated on a 4-point scale. Examples include explanations and error correction.
- Overall ratings of program implementation and evidence based instructional practices are available on a 6-point scale.

Requirements

Moving Up! Implementation Coach requires:
- An iOS tablet with iOS version 8.0 or above
- Moving Up! Implementation Coach app available from the App Store
- A DIBELS Data System account
- An educational professional trained to reliably collect data using Moving Up! Implementation Coach
- A copy of the instructional lesson being implemented
- A copy of the User’s Manual
Data Management

The app links to a DIBELS Data System account that provides Instructional Implementation Reports to help districts and schools access and interpret their data.

Reports include:
- Fidelity of Implementation: Instructional Areas Report
- Fidelity of Implementation: Components Report
- Use of Evidence-Based Instructional Practices Report
- Intervention Intensity Report

Currently Moving Up! Implementation Coach accommodates the collection of fidelity data related to the literacy program Enhanced Core Reading Instruction.

Research

Moving Up! Implementation Coach is based on the CTL Observation Framework, developed through years of USDOE funded research including the Early Learning in Mathematics project (Clarke, Baker, Chard, Smolkowski & Fien, 2008) and the Enhancing Core Reading Instruction project (Fien, Baker, Smokowski, Santoro & Smith, 2009) which led to the development of the Ratings of Classroom Management and Instructional Support observation tool (RCMIS, Doabler & Nelson-Walker, 2009; Doabler et al., 2014). The CTL Observation Framework has evolved from our conceptual framework for effectively scaling evidence based practices. Schools should collect implementation data, including fidelity of implementation, intervention intensity, and delivery of evidence based practices and pair these data with student performance data to improve data-based decision making (Baker, Fien, & Baker, 2010). We have utilized the CTL Observation framework in thousands of classrooms across the U.S., across content areas (reading and math), grade levels (K through 8th grade), and languages of instruction (English and Spanish).

Results across studies have demonstrated that measuring these instructional behaviors and practices is significantly related to math outcomes (Doabler et al., 2014; Doabler et al., 2015) and literacy outcomes (Fien et al., 2015; Nelson-Walker et al., 2013; Smith et al., 2016), and that these measures are sensitive to distinguish teachers that are effectively implementing evidence based practices from those that need more support (e.g., coaching support; Nelson-Walker et al., 2013).

Moving Up! Implementation Coach simplifies the collection of this type of information in an easy-to-use app.

Moving Up! Implementation Coach™

### Pricing

**Pricing is determined by student population in grades K – 2.**

<table>
