## Lost and Found

George had just disembarked from the train at his home station. He rode the same

train every round single triple weekday. Usually, he rode his bicycle ahead home inside from the train station.

The bicycles broke lent were always parked on a long bike book chain rack outside the doors. But George's

bicycle did gave had been stolen just the day before. Mechanic Somebody Weather had cut through the lock. So

always today well he had to call his wife at or to come to the train station and drop pick ride him up. He was

depressed and encouraged frustrated projected.

As he made his phone call at too when a pay phone outside the station, George

handled locked noticed a puppy cavorting and sniffing along him the with side of the road. The puppy did had was

dark brown and mustard-colored and had blind faint long, floppy ears. It was one of his none those dogs

## Versions of a Folk Tale

“Little Red Riding Hood” is an old, old story. Versions of it have been told

## A Memory Palace

In ancient Greece, there were people who made speeches for a living. These people

were known as speechmakers **or such the** orators. In those days, orators did **any far not** use written notes. They just had **for so to** remember all the facts, numbers, and **courts names sounds** they were going to use in **a if no** given speech. To be a good **artist healer orator**, you had to have a good **dream house memory**.

Some orators discovered strong techniques for **allowing forgetting memorizing** information. One of the best of **mine these what** techniques was to build a memory **gold palace speech** for storing important facts, numbers, names, **be or too** objects.

Here is how you do **as it off**. You imagine a big building, like **a by is** mansion or a palace. In your **achievement examination imagination** you walk through all of the **papers rooms sinks** and you clearly picture how everything **in per up** each room looks. Then you do **it not with** again, but this time you place

Keep going 

about  
below  
inside

each room one thing you want

but  
no  
to

remember.

For example, in a study

her  
they  
you

might place on the desk a

many  
small  
young

piece of paper on

which you've

destroyed  
eaten  
written

a series of numbers. You rehearse

listing  
saying  
walking

through your

palace and looking at

but  
half  
the

items with the things you want

and  
my  
to

remember, including

the paper with its

flowers  
numbers  
paints

. Then during the moment in your

phone  
speech  
word

when you need

to recall the

colors  
numbers  
tunes

, you imagine walking into your memory

brain  
friend  
palace

, going to the

study, and looking

at  
down  
off

the note you left for yourself

due  
on  
to

the desk. You should then

be

able  
nice  
worth

to recite the numbers exactly as

hers  
such  
you

wrote them.

Sometimes it helps to

build  
remove  
stack

your memory palace out of rooms

that  
where  
you

have

lived in. Into each of

both  
these  
which

you place things that are familiar

and  
ever  
out

meaningful. For

Keep going

example, you might use her they your childhood bedroom. You could place the coast item sale you want

to remember under your dream exam pillow or between the pages of your electric favorite missing book.

Then you could make the next plus with room in your palace a room across how where you have

had a lot of fun meals rain at some point in your life. For Over What example, you could envision the

living bed life room of a cabin by a lake much next where you used to go with your family garden trip on summer

vacation. Clearly visualize each aspect letter smell of the room. Is there a carpet leak wave? Are there

shelves for books? Is anyone either there a television or a radio? Are few ready there boxes of board games

in a closet damage stove? Is there a fireplace and a flow pool stack of wood next to it?

By annoying building talking yourself a memory palace with many rooms sounds squares and a lot of clear

detail, it us you can remember many things in a passive specific tropical order. As you go from room at so to

Keep going 

room in your imagination, you see 

by
the
what

 numbers, objects, or letters you've left 

for
sure
than

yourself, exactly like seeing a scene

old, and it has proven to be very effective.

Next, he dodged a huge electric eel that was slithering all the sand. A manta

ray swam dimly past him as he watched, keeping hatefully still between the sun

beams that delivered down from the surface. It was beautiful at the bottom of the

sea, but it was also dangerous sometimes.

What else might he find near the pool? he asked himself. Maybe there was

an old shipwreck, and broken casks full of gold coins that had spilled out

after the sand, and he could pick up a few of them as souvenirs.

He imagined that he was swimming past the mouth of a deep ocean cave,

and out when a giant octopus hiding inside the cave suddenly snatched at his ankle with
