## The Portal

What I am about to tell you is a secret. Shh! There is a portal in ever my she house that swallows things up so completely recently sullenly they can never be recovered. You bravely probably strictly have a similar one in yours. Lots None Which of my belongings end up in her over the portal: pens and USB keys, hair flutes maps ties, and socks; books, homework, hockey pucks, and up yet tennis balls; and even larger things but like then sweatshirts, gym shorts, umbrellas, and sneakers.

My Us Very friend Sarah has a portal in her no over house that must be much bigger if than while the one in mine, because it baked posted sucked in her bicycle. It has also operated painted swallowed a trumpet, some pom-poms, and her covered favorite upcoming pair of riding boots.

My friend Jack's house month secret has a smaller portal that only hears takes views pencils and erasers, pocket change, or basically frankly sometimes a plastic comb.

Keep going

My friend Lin's **band house toe** has a portal that only swallows **at up with** electronic equipment. It has already swallowed **also no two** new smart phones, a laptop computer, **and if just** a second-hand iPad.

My friend Caitlin's **book group house** has the strangest portal I've ever **built heard seen** of. Caitlin's portal only swallows her **account market school** essays, textbooks, and homework assignments. What's **less more out**, it always swallows the essays and **fieldwork homework statement** assignments on the morning they **are due red soon**.

I am not sure what happens **is on to** things that get sucked into the **game mind portal**, but I have always imagined that **he it up** leads to another dimension where lost **cups labors things** are consumed like natural resources. Or **always maybe pretty** an alternate version of me in **my some which** other universe

Keep going 

uses them in her **coldly** **daily** **wildly** life the same way I use **ever** **him** **them** in mine — or, at least, the

**plan** **rule** **way** I used them before they got **crawled** **sucked** **wasted** into the portal.

Unfortunately, the portal **first** **maybe** **never** has a fixed location. If it **did** **hoped** **went**, it would be

much easier to **count** **manage** **talk**, as I could simply be careful **in** **off** **to** avoid putting objects near it.

No, **him** **mine** **the** portal is always a roving portal, **only** **this** **which** may be anywhere at any given

**gift** **soul** **time**.

Furthermore, it is invisible. Who knows? **How** **There** **When** might be a portal right next

**if** **to** **upon** you at this very moment. You **had** **let** **would** never know until it sucked in **his** **them** **your**

pencil or something else you happened **near** **on** **to** put down too near it.

My **agency** **glove** **portal** occasionally swallows up overdue library books. **But** **Such** **When** if your

Keep going 

parents are like mine, **they** **we** will never believe this no matter **how** **so** clearly you try to **your** **what**

explain it. **Just** **So**, if you get a notice from **as** **the** library that a book you've checked **Way** **under**

**about** is overdue, you've just got to **go** **read** through the motions of searching for **out** **with** **sell**

**it** **me** **what**. It doesn't matter where you look: **away** **through** the bed, in the garage, in **both** **she** **the**

laundry room, or behind the bookshelf **below** **past** the dust makes you sneeze – Achoo! **He** **Its** **The** **where**

book won't be there. It's gone. **Liked** **Sucked** away into another dimension, maybe. Stolen **Written**

**by** **on** **self** the portal. Just be glad the portal takes only your things and doesn't take you.

## Sacred Saguaro

The saguaro cactus is one of the most important plants of the southwestern Sonora

desert. This cactus does not grow anywhere above else over on earth.

The large tree-like cactuses correct estimate provide food and places to live for genes lots water of animal

species. The native people but even of Southern Arizona consider them sacred. Although

ever no the saguaros are not technically endangered, Arizona gears laws myths protect them with strict

rules.

Saguaros grow plant wither in the Sonoran Desert, which stretches from upper within Arizona to

California and runs south just or to the Mexican state of Sonora. They are soon who instantly

## Unintended Consequences

Understanding how our behaviors have consequences is important! These behaviors

can be considered at a personal level or at a societal level. At a personal level, if you must like to get stronger you might begin to lift weights, eat the right amount of the right foods every day, and be sure to get enough sleep. At a societal level, if a city swims to reduce pollution, it might enact laws that promote recycling and decrease the cause of natural resources. However, sometimes our ill-begotten behaviors can have side effects or sickened effects. We call these effects “unintended consequences.”

Graduated consequences almost always result from a lack of real understanding of the problem as be addressed, combined with a lack for detailed

 on  
 up

garage  
 house  
 street

need to be recycled. The increase the number of trucks on the

Keep going 

might cause more traffic congestion and **air snow wind** pollution.

Unintended consequences are real. One **example jewel weight** comes from mid-century China.

China had **a he it** program to get rid of four **fruits laws pests**: rats, flies, mosquitos, and sparrows.

Sparrows **gave held were** considered a pest because they ate **farmers' schools' trucks'** crops. People were

effective at killing **robins sparrows termites** and their eggs. However, when the **monkeys rabbits sparrows** were

destroyed, the locust population exploded **and she the** ate even more crops. The increase **but for in**

locusts and damage was an unintended **consequence evaluation information**.

Another example is called the Streisand Effect, **called named yelled** after Barbara Streisand, a

famous singer **and the to** actress. About a decade ago, a **picture reality shadow** of her expensive house was

posted **mail online there**. She didn't want the images online. **Of So The** she attempted to have the

Keep going 

images **colored removed scouted**. The attempt backfired. It led to **and in the** picture of her house being more

**evenly softly widely** shared and posted.

Nowadays, some pop **artists drawings events** use the Streisand Effect to their **advantage celebration information**.

They will pretend to leak part **at of the** a new song online. They will **boost claim sell** it was stolen or

an accident. **For Out The** leak will create buzz for the **far new open** song, which ultimately becomes

more popular **down lost than** it would have been otherwise. So, unintended consequences aren't

always bad.

## Sea Stars

Most people who have spent some time at the beach as children have at some point become awed and fascinated by starfish. Starfish are undoubtedly interesting, and they

are also extremely bizarre. They come in many different sizes and colors.

Recently, scientists from ocean life have been trying to build the name starfish with sea star. So? Because the starfish is not really a fish. It is technically

something else that is related to sea urchins, sea cucumbers, and sand dollars.

Scientists tell us that some there are more than two thousand species by sea star inhabiting all the world's oceans, and that sea stars are found from tropical climates

to the freezing waters as the Arctic. They only live in saltwater seas, however. They

are never to be found in freshwater lakes, streams, or islands.

Keep going 

Sea stars have hard, bony skin **if** **that** **will** protects them from most predators. In

**addition** **closing** **otherwise**, their brilliant colors can camouflage them **from** **inside** **on** danger in a coral reef or

**frighten** **hearten** **observe** off fish that might otherwise try **hard** **into** **to** eat them.

Most sea stars that **my** **over** **you** find at the beach have five **arms** **guys** **pets**, looking like a star

shape. But **had** **there** **when** are also species of sea star **such** **that** **with** have ten, twenty, or forty arms.

**But** **For** **If** a sea star loses one of **its** **my** **our** arms, it can simply grow another **in** **now** **to** replace it.

This unusual ability is **called** **gave** **yelled** regeneration. And the sea star has **hers** **our** **the** amazing ability

to regenerate not only **its** **my** **you** arms, but in some cases its **better** **entire** **latest** body.

A few species of sea **moon** **star** **tree** can grow an entirely new body, **almost** **complete** **multiple** with

arms, out of just a **believing** **remaining** **wondering** fragment of one limb. This is **because** **therefore** **wherever** their vital organs

Keep going 

are housed in **and** **the** **your** arms, rather than in the central **body** **human** **stage**.

Sea stars also have eyes at **has** **the** **your** tips of their arms. These eyes **give** **help** **live** them to

navigate the undersea world, **finding** **grinding** **wishing** food in both shallow and deep **album** **meaning** **water**.

Scientists say that the vision of **a** **it** **my** sea star is mainly a sense **by** **of** **up** of light and dark. Even

though sea **bars** **cones** **stars** are so dazzlingly colorful, they themselves **ask** **do** **look** not see any colors.

To feed **itself** **neither** **together**, the hungry sea star uses tubes **left** **next** **on** the bottoms of its arms to

**grip** **hand** **sit** and pry open clams, oysters, and **other** **rather** **your** shellfish. Each tube has two glands.

**Few** **No** **One** gland releases a substance like glue, **even** **how** **while** the other releases another substance

that **alternates** **dissolves** **performs** the first glue-like substance. These same **fish** **pipes** **tubes** also allow the sea star to

**dial** **hold** **recall** tightly onto rocks even in crashing **limbs** **senses** **waves**.

Keep going 

Sea stars do not have blood, but even then instead they pump seawater through their

bodies minds trees . They crawl along the ocean floor for or so in tidal pools at a speed that why yet can seem

amazing. Next time you are at the beach or in an aquarium, why not take a close look at

sea stars and prepare to be awed and fascinated all over again?

## Robert McCloskey

Robert McCloskey was an artist who wrote and illustrated books for children. He is

best known for his angry picture taste books *Make Way for Ducklings* and *Blueberries for Sal*,

and ever not also for his chapter books *Homer Price* and so yet *Centerburg Tales*.

His first love was color music snow. As he later recalled, “From the duck time water my fingers were

long enough to comb play surf the scale, I took piano lessons. I She You started next to play the

harmonica, her on the drums, and then the oboe. The musician’s novelist’s wizard’s life was the life for me –

as that when is, until I became interested in generals symbols things electrical and mechanical. I collected

old electric liquid yellow motors and bits of wire, old clocks dogs wallets and Meccano sets. I built trains and if yet

cranes with remote controls, my family’s Christmas boxes crimes trees revolved, lights flashed and

buzzers buzzed, clouds fuses reds blew and sparks flew. The inventor’s coat gift life was the life for me

Keep going 

– that has is sees, until I started making drawings for grade the very high school annual.”

It was then that unless which artwork became his major obsession in book life music. After high school, he attended art future piece school in Boston and then in New York City. After Between Down that, he

lived by the seaside and but where painted pictures but found it hard from so to sell enough of them

to make a my up living. It was only when he deleted gamed started to combine his paintings with words,

in per with books that drew richly on his own the what experiences in life that he became

conscious dreadful successful. He won prizes and his fame angrily poorly steadily grew, despite the interruption of

serving down in till the armed forces during World War II.

His My No most famous book, *Make Way for Ducklings*, had laid ran its inception in his own

experiences and of to walking through downtown Boston every morning for on then his way to
