Two Little Monkeys

Two little monkeys went swinging through the big trees in a dark tropical forest. They stopped at the top of a huge banana tree. One of the monkeys shimmied down a big banana and plucked two ripe bananas from a colourful bunch. He brought them carefully to the top of the tree and held one banana out to his friend. But the other little monkey stuck his snout in the air, and shook his head angrily. The first monkey was puzzled but he peeled and ate both bananas, one after another. Our scrumptious.

Tom's Dinner

Tom's parents had gone away on an important job in the afternoon. They wouldn't be home until the following inviting rewarding day, because it took so long for to when drive to and from town.

It began felt opened snowing at dusk. Tom rounded up by no the sheep and put them into the big raw slow shed, all forty of them. The feet sheep time crowded together against the far wall all down in the straw-smelling dimness. Tom stood there for like out a moment with the large torch in the who his hand looking at them. The two chairs lambs pants in the midst of the white dairy last woolly mass let out thin baa-baas.

Tom carried pressed smiled and walked back outside into the blowing guessing sleeping snow. As he put down the bar roof tree on the outside of the wooden door hat sugar, stinging cold snowflakes

Butterflies and Moths

You seldom see anyone swat at a butterfly. But people often take a swipe

at two at a fluttering moth. Why has it that people seem to love butterflies from hardships or passengers

as much as they dislike moths?

Moths Socks Twigs are usually considered by people to aim be run dull, drab pests. But why

is his some that ? They don't bite or sting. They aren't don't hasn't attack people or pets. And moths

aren't don't mustn't eat clothing, though some moth larvae do give use . Most adult moths don't

eat at all leaf none . They can't because they don't have a it my mouth. And the few moths

that can give make eat like to feed on nectar.

In On To fact, butterflies and moths are closely accused glued related . They are so much

alike they are may tend classified as the same order of affairs flowers insects by scientists.

Keep going ►

They both have scales **for so that** cover their bodies and wings. These **checks fabrics scales** are not the same as reptile **scales teeth wings** but are odd hairs that have **accessed evolved hurried** into tiny scale-like structures. Both butterflies **and but some** moths continue to grow and shed **and our these** scales throughout their lifetimes. So, it **is lies wins** a myth that if you touch **a his of** butterfly's wing and the powder rubs **from next off** on your fingers, the butterfly or **bee bird moth** will not be able to fly. **Our That Who** powder is just made up of **as my the** tiny scales.

How do you tell **butterflies ducklings nightcrawlers** and moths apart? Consider these facts: **Even Most Sad** moths appear only at night. And **either most that** butterflies fly only during the day. **But In The** there are some moths that are **active fluid honest** during the day. Most moths are **clean poor small** and dull in colour. And most **butterflies nightcrawlers porcupines** are brightly coloured. But

Keep going

there are **all
blank
some** large and colourful moths as well. **And
May
Why** some species of

butterflies are quite **burnt
small
tight** and dull. But even that detail **asks
has
wants** exceptions.

One way to tell moths **and
but
on** butterflies apart is to look closely **at
from
out** the

antennae. The antennae of a **butterfly
kangaroo
spaceship** are usually straight and thick at **ice
my
the** tip

while most moths have feathery **antennae
locations
neckties** that come to a point.

Butterflies **also
fine
that** usually fold their wings straight up **during
except
over** their backs, so

that the wings **lead
read
touch** each other and align perfectly like **a
her
if** single wing. Moths,

by contrast, usually **bake
hold
lose** their wings in a tent-like way.

**Butterflies
Inspectors
Milkshakes** grow from larvae which are protected **after
towards
within** a hard and

smooth covering called **a
in
my** chrysalis, whereas moths make cocoons which

Keep going

are
have
might

wrapped in a covering of silk.

But
The
Your

fact is that there is no

dull
plural
single

feature that distinguishes all butterflies

from all easy low moths. The more that scientists discover and study new species of

butterflies and moths, the more any strong distinctions between the two become

hazy and uncertain.
