A Memory Palace

In ancient Greece, there were people who made speeches for a living. These people

were known as speechmakers **or such the** orators. In those days, orators did **any far not** use written

Some orators discovered strong techniques for **allowing forgetting memorising** information. One of

the best of **mine these what** techniques was to build a memory **gold palace speech** for storing important facts,

Here is how you do **as it off**. You imagine a big building, like **a by is** mansion or a

For example, in a study

items with the things you want

Sometimes it helps to

example, you might use her they your childhood bedroom. You could place the coast item sale you want

to remember under your dream exam pillow or between the pages of your electric favourite missing book.

Then you could make the next plus with room in your palace a room across how where you have

had a lot of fun meals rain at some point in your life. For Over What example, you could envision the

lounge bed life room of a cabin by a lake much next where you used to go with your family garden trip on summer

shelves for books? Is anyone either there a television or a radio? Are few ready there boxes of board games

in a cupboard damage stove ? Is there a fireplace and a flow pool stack of wood next to it?

By annoying building talking yourself a memory palace with many rooms sounds squares and a lot of clear

detail, it us you can remember many things in a passive specific tropical order. As you go from room at so to

room in your imagination, you see by
the numbers, objects, or letters you've left for
