Practice Passage

Tom goes to a school far from his house. Every morning, he takes a school _____ to go to school. In the _____, he also takes a bus home.

Correct: _____

Incorrect: _____

Adjusted Score: _____

The iPhone

Over ten years ago now, the Apple Corporation launched the iPhone. People lined up around the block at Apple stores all over the United States the day it went on sale. Between one quarter and three quarters of a million phones were sold on the first weekend. Later that year, the iPhone began to sell in Europe, and over the next seven years, it became available in almost every country around the world. Now, about one billion iPhones have been sold.

The iPhone was not the first smart phone. But it was the first to combine a phone, a music player, and a computer for using the internet all in one. Also, it was a touchscreen phone. Previous smart phones used a hard keyboard. People loved the iPhone for the way it worked and for the way it looked.

real free time. How often have been at the beach, or in restaurant, or in a public park, seen people using their smartphones rather than just swimming, enjoying their food, or looking up at the sky?

Because of the iPhone, people can now document and share their own lives on a scale that has never been seen before. They post family pictures on Instagram, political opinions on Twitter, and life anecdotes on Facebook. There is now so much information available that it is hard to process it all and emotionally. Some people say that people now spend more time texting and Skyping their friends than they do meeting them to face.

These days the technology that was pioneered by the first iPhone is used in smartphones

made by lots of other . All the same, most people still to the iPhone
for the most new features. One thing we might someday soon is a
screen that bend. Another might be a battery can be charged by the sun
by motion. Some people even predict that can project holograms. It is
to know what the future will . After all, until a little over ten years ago, the iPhone
itself was but a dream.
